## **BACKGROUND**

[The 2014-15 General Appropriations Act, S.B. 1, 83<sup>rd</sup> Texas Legislature, Regular Session, 2013 \(Article II, Department of State Health Services \[DSHS\], Rider 93\)](#) specified that DSHS shall collect hospital emergency department (ED) data as set forth in [Chapter 108, Texas Health and Safety Code \(THSC\)](#). DSHS currently collects inpatient and outpatient data from hospitals and ambulatory surgical centers. DSHS began collecting ED data from hospitals on January 1, 2015 per [25 Texas Administrative Code \(TAC\), Sections 421.71-421.78](#), and in conjunction with the collection of inpatient and outpatient data.

Sections [108.011\(a\)](#) and [108.013](#) of the THSC require DSHS to provide public use data promptly and to protect patient and physician privacy and confidentiality. Also, THSC, Section [108.012](#) authorizes DSHS to charge the data requestor a standard fee to recoup funds for sustaining the program processing the data.

## **HOSPITAL EMERGENCY DEPARTMENT PUBLIC USE DATA FILES**

The Hospital Emergency Department Public Use Data Files include data from Inpatient "Public Use Data Files" (PUDF) and the Outpatient PUDF. The Inpatient PUDF contains patient-level information for patients which were admitted into the hospital for care. The inpatient hospital stay may last several hours to days, weeks or years, depending upon the condition or status of the patient before being discharged; the Outpatient PUDF contains patient-level information for outpatient services that does not go more than twenty-four (24) hours from the time they are being treated in the hospital or ambulatory surgery center (ASC). DSHS only collect data from these hospitals and ASCs in which patient's received services one or more procedures that included an invasive surgical procedures or imaging/radiological procedures and all hospital emergency department (ED) visits.

The providers/submitters must submit their data according to the schedule specified in [25 TAC, Sections 421.73, 421.75 and 421.76](#) (which references 25 TAC, Sections [421.63, 421.65 and 421.66](#)). The reporting schedules are also posted on the DSHS/THCIC webpage <http://www.dshs.texas.gov/THCIC/datareportingschedule.shtm>. This means that the Hospital ED PUDF reflects a snapshot in time and each quarter may contain some inpatient encounter records or outpatient event records dated in the previous quarter (i.e. for a complete calendar year of data, be sure to check the first quarter of the following year).

The Hospital ED PUDF contains:

- Inpatient (IP) Base Data #1 File – This file contains the required data elements. For example, codes regarding: Facility Identifier; Principal Diagnosis; Other Diagnoses; External Cause of Injury; Principal Procedure; Other Procedures; Diagnosis Related Group; Type of Admission; Source of Admission; Length of Stay; Patient Ethnicity; Patient Race; Patient Residence City, County, ZIP code, Patient Status, Primary Payment Source and other data used for most research topics.
- IP Base Data #2 File – This file contains most of the situationally required data elements and some calculated fields. For example, codes regarding: Condition Code; Value Code; Occurrence Code, Occurrence Day, Charge amounts for Service Pay Groups; and other information that may be useful regarding the inpatient stay research.
- IP Charges File - This file contains charges data. This file can be linked with the other IP data files via the Record ID. This file contains information regarding the revenue codes, modifiers and specific charges for services or products.
- Outpatient (OP) Base Data File – This file contains the required data elements. For example, codes regarding: Facility Identifier; Diagnoses; External Cause of Injury; Procedures; Diagnosis Related Group; Charge amounts for Service Pay Groups; Patient Ethnicity; Patient Race; Patient Residence City, County, ZIP code; Patient Status, Source of Admission; Primary Payment Source, and other data used for most research topics.
- OP Classification Data File – This file contains calculated data elements and classifiers assigned by THCIC. Clinical Classification Software codes; and, Clinical Risk Group codes, status and severity;
- OP Charges File -This file contains charges data. This file can be linked with the other OP data files via the Record ID. This file contains information regarding the revenue codes, modifiers and specific charges for services or products. This file also contains Enhanced Ambulatory Patient Grouping codes and Ambulatory Payment Classification information.
- Facility Type Data File – This file contains the information about specialty units or specific types of services provided at the hospitals.

The following supplementary information is provided along with the Hospital ED PUDF:

- Hospital Comments File – This PDF file contains any comments that the facilities included when they submitted and certified their inpatient data.
- Outpatient Facility Comments File – This PDF file contains any comments that the hospitals included when they reviewed and certified their outpatient data.
- Facility Reporting Status Document (Inpatient and Outpatient) – These documents provide information about whether the hospitals reported any data. It also indicates whether they reported low numbers and their identification was masked in the data, reported no discharges, or if they closed or were out of compliance, and whether they submitted any comments about their data.

The 2019 Hospital ED PUDF is available in seven fixed length or tab-delimited format text files: Inpatient Base Data #1, Inpatient Base Data #2, Inpatient Charges, Outpatient Base Data, Outpatient Classification Data, Outpatient Charges, and Facility Type Data files. The sizes of the files are as follows:

**First quarter, 491 facilities:**

|                        |                    |               |                    |          |               |          |
|------------------------|--------------------|---------------|--------------------|----------|---------------|----------|
| IP Base Data #1        | 406,180 records    | 166 variables | Fixed field format | 311 MB   | Tab-delimited | 166 MB   |
| IP Base Data #2        | 406,180 records    | 99 variables  | Fixed field format | 252 MB   | Tab-delimited | 109 MB   |
| IP Charges             | 8,252,417 records  | 13 variables  | Fixed field format | 645 MB   | Tab-delimited | 384 MB   |
| OP Base Data           | 2,544,659 records  | 128 variables | Fixed field format | 2,148 MB | Tab-delimited | 1,002 MB |
| OP Classification Data | 2,544,659 records  | 83 variables  | Fixed field format | 687 MB   | Tab-delimited | 344 MB   |
| OP Charges             | 21,413,050 records | 19 variables  | Fixed field format | 2,185 MB | Tab-delimited | 1,686 MB |
| Facility Type Data     | 491 records        | 30 variables  | Fixed field format | 44 KB    | Tab-delimited | 39 KB    |
|                        | 491 records        | 30 variables  | Fixed field format | 44 KB    | Tab-delimited | 39 KB    |

**Second quarter, 492 facilities:**

|                        |                    |               |                    |          |               |          |
|------------------------|--------------------|---------------|--------------------|----------|---------------|----------|
| IP Base Data #1        | 398,940 records    | 166 variables | Fixed field format | 306 MB   | Tab-delimited | 164 MB   |
| IP Base Data #2        | 398,940 records    | 99 variables  | Fixed field format | 247 MB   | Tab-delimited | 107 MB   |
| IP Charges             | 8,017,296 records  | 13 variables  | Fixed field format | 627 MB   | Tab-delimited | 372 MB   |
| OP Base Data           | 2,463,527 records  | 128 variables | Fixed field format | 2,079 MB | Tab-delimited | 977 MB   |
| OP Classification Data | 2,463,527 records  | 83 variables  | Fixed field format | 665 MB   | Tab-delimited | 336 MB   |
| OP Charges             | 21,350,818 records | 19 variables  | Fixed field format | 2,179 MB | Tab-delimited | 1,684 MB |
| Facility Type Data     | 492 records        | 31 variables  | Fixed field format | 44 KB    | Tab-delimited | 39 KB    |
|                        | 492 records        | 31 variables  | Fixed field format | 44 KB    | Tab-delimited | 39 KB    |

**Third quarter, 488 facilities:**

|                        |                    |               |                    |          |               |          |
|------------------------|--------------------|---------------|--------------------|----------|---------------|----------|
| IP Base Data #1        | 400,377 records    | 166 variables | Fixed field format | 307 MB   | Tab-delimited | 165 MB   |
| IP Base Data #2        | 400,377 records    | 99 variables  | Fixed field format | 248 MB   | Tab-delimited | 107 MB   |
| IP Charges             | 8,192,082 records  | 13 variables  | Fixed field format | 641 MB   | Tab-delimited | 382 MB   |
| OP Base Data           | 2,440,133 records  | 128 variables | Fixed field format | 2,059 MB | Tab-delimited | 971 MB   |
| OP Classification Data | 2,440,133 records  | 83 variables  | Fixed field format | 659 MB   | Tab-delimited | 333 MB   |
| OP Charges             | 21,130,812 records | 19 variables  | Fixed field format | 2,156 MB | Tab-delimited | 1,668 MB |
| Facility Type Data     | 488 records        | 31 variables  | Fixed field format | 43 KB    | Tab-delimited | 39 KB    |

The data must be imported into a software package. The Hospital ED PUDF does not include software for analyzing the data. The data files have been tested with several software packages including Microsoft Access 2016 (Software limits may not allow all data to be loaded), Microsoft Excel 2016 (Software limits may not allow all data to be loaded), SAS 9.4, and IBM SPSS Statistics 24. Please note that files containing in excess of 1,048,576 records will not fit on a single Microsoft Excel 2016 worksheet.

**DATA PROCESSING AND QUALITY**

Each hospital is responsible for the accuracy and completeness of its data. Even so, DSHS' vendor uses an automated process to audit each record for consistency and conformity with the definitions stated in the data specification manual. Records failing an audit are marked as errors and the hospital is notified of the errors. The hospital may either correct and upload the data, or accept the data as is submitted.

Following the correction process, DSHS uses valid claims data to build files of “encounters”; one encounter contains the final discharge and all related interim claims information for a patient. Then, each submitting hospital has an opportunity to review its data and correct any known or previously unidentified errors, such as mapping errors (codes that had valid code responses, but were not correct for the patient record). Hospitals may certify the encounter data with or without comments. The comments may provide information about the hospital’s data submission or correction process. For example, a hospital comment may indicate whether the hospital changed vendors during the quarter and there are codes that did not get mapped properly, or whether the facility could not submit corrections before the deadline for corrections ends.

Finally, DSHS builds a final inpatient encounter and separate outpatient event file that includes all data for those datasets, including the corrected data submitted by the hospitals. DSHS staff checks and adjusts for missing values and invalid codes in this file before the Hospital ED PUDF is generated. Users are advised to examine every data element to be used for missing values and invalid codes, and to read accompanying notes, comments, and other descriptive text.

## **PATIENT/PHYSICIAN CONFIDENTIALITY**

The legislative intent behind the creation of the Hospital ED PUDF was that the data and resulting information be used for the benefit of the public. This is specified in THSC, Section [108.013](#). THSC, Section [108.013\(c\)](#) also stipulates that DSHS may not release and a person or entity may not gain access to any data that could reasonably be expected to reveal the identity of a patient or physician. Any effort to determine the identity of any person violates THSC, Section [108.013](#) and may incur civil or criminal penalties as stated in THSC, Sections [108.014](#) and [108.0141](#), respectively. In addition, under THSC, Sections [108.013\(e\)](#) and [\(f\)](#), data and information collected by the DSHS under this statute that identifies a patient and/or physician in the Hospital ED PUDF cannot be used for discovery, subpoena, or other means of legal compulsion or in any civil, administrative, or criminal proceeding. Pursuant to THSC, Section [108.013](#), DSHS excludes all direct personal and demographic identifiers (e.g., names, address, patient identifiers, admission and discharge dates) that might lead to the identification of a specific patient from the PUDF.

Additionally, to protect patient identities, DSHS has suppressed these data elements in this release of the PUDF (suppression procedures were applied separately within inpatient and outpatient data):

- The last two digits of the patient's ZIP code are suppressed if there are fewer than thirty patients included in the ZIP code.

- The ZIP code is changed to '88888' for patients from states other than Texas and the adjacent states (i.e., Arkansas, Louisiana, New Mexico, and Oklahoma).
- The entire ZIP code and gender code are suppressed if the ICD-10-CM code indicates alcohol use, drug use, or an HIV-STD diagnosis.
- The entire ZIP code and provider name are suppressed if a hospital has fewer than five discharges of a particular gender, including 'unknown'. The provider ID is changed to '999998'.
- The entire ZIP code is suppressed if a hospital has fewer than fifty discharges in a quarter. The provider ID is changed to '999999'.
- The country code is suppressed if the country field has fewer than five discharges for that quarter.
- The county code is suppressed if a county has fewer than five discharges for that quarter.
- Age is represented by 22 age group codes for the general patient population and 5 age group codes for patients with one or more diagnosis codes indicating an HIV-STD diagnosis, alcohol use, or drug use.
- Race is changed to 'Other' and ethnicity is suppressed if a hospital has fewer than ten discharges of a particular race code.

To protect physician identities in inpatient data provided by hospitals, THSC, Sections [108.002 \(17\)](#), [108.009](#), and [108.011](#) require creation of a uniform identification number for physicians in practice. Uniform physician identifiers are available except when the number of physicians represented in a Diagnosis-Related Group (DRG) or Enhanced Ambulatory Patient Grouping (EAPG) for a hospital is less than the minimum cell size of five.

It may be possible in rare instances, or through complex analysis and with outside information, to ascertain from the PUDF the identity of individual patients. Considerable harm could result if this were done. PUDF users are required to sign and comply with the DSHS Hospital Emergency Department Data Use Agreement in the Application before shipment of the PUDF. The Data Use Agreement prohibits attempts to identify individual patients or physicians. A person who knowingly or negligently releases or accesses this data with criminal intent may incur a penalty. Civil and/or criminal penalties may be assessed under THSC Sections [108.014](#) and [108.0141](#).

## **RESTRICTIONS ON DATA USE**

Users of the Hospital ED PUDF are cautioned about using less than a year of data to make any hospital quality assumptions.

THSC, Sections [108.013\(c\)\(1\) and \(2\)](#) and [108.013\(g\)](#) prohibit DSHS from releasing, and a person or entity from gaining access to, any data that could

reveal the identity of a patient or the identity of a physician unless specifically authorized by the Act. Any effort to determine the identity of any patient or physician or to use the information for any purpose other than for analysis and aggregate statistical reporting violates the [Chapter 108, THSC](#) protection processes and the Data Use Agreement. By virtue of the Agreement, the signer agrees that the data will not be used to identify an individual patient or physician. Because of these restrictions, under no circumstances will users of the data contact an individual patient or physician or hospital for the purpose of verifying information supplied in the DSHS Hospital ED PUDF. Any questions about the data must be referred to DSHS only. DSHS does not assist with data analysis. The data are protected by United States copyright laws and international treaty provisions.

In the Hospital Emergency Department PUDF Data Use Agreement, the purchaser and end-user of the data are referred to as the “licensee”. To acquire the data, the licensee must give the following assurances with respect to the use of DSHS Hospital ED PUDF:

- The licensee will not release nor permit others to release the individual patient records or any part of them to any person who is not a staff member of the organization that has acquired the data, except with the written approval of DSHS;
- The licensee will not attempt to link nor permit others to attempt to link the hospital stay records of patients in this data set with personally identifiable records from any other source, including any THCIC research data files;
- The licensee will not release nor permit others to release any information that identifies patients, directly or indirectly;
- The licensee will not attempt to use nor permit others to use the data to learn the identity of any physician;
- The licensee will not permit others to copy, sell, rent, license, lease, loan, or otherwise grant access to the data covered by the Data Use Agreement to any other person or entity, unless approved in writing by DSHS;
- The licensee agrees to read the User Manual and to be cognizant of the limitations of the data;
- The licensee will use the following citation in any publication of information from this file:

*Texas Hospital Emergency Department Public Use Data Files*, [quarter and year of data]. Texas Department of State Health Services, Center for Health Statistics, Austin, Texas. [date of publication];

- The licensee will indemnify, defend, and hold the DSHS, its members, employees, and the Department's contract vendors harmless from any and all claims and losses accruing to any person as a result of violation of this agreement; and
- The licensee will make no statement nor permit others to make statements indicating or suggesting that interpretations drawn from these data are those of DSHS.

The licensee understands that these assurances are collected by DSHS to assure compliance with its statutory confidentiality requirement. The signature on behalf of the licensee indicates the licensee's agreement to comply with the above-stated requirements with the knowledge that under THSC, Sections [108.014](#) and [108.0141](#) to knowingly or negligently release data in violation of this agreement is punishable by a fine of up to \$10,000 and an offense is a state jail felony. By signing the Data Use Agreement, the licensee (or PUDF user) has been informed that the potential for both civil and criminal penalties exists.

Users of report generating software to access the PUDF are required to purchase a license to use the data.

## **DATA LIMITATIONS**

### **(Users are advised to become familiar with the data limitations.)**

- THSC, Section [108.009\(h\)](#) requires that a uniform submission format be used for reporting purposes. Beginning with 2005, all data are collected from the THCIC 837 format (a modified version of the American National Standards Institutes, Accredited Standards Committee X12, National Electronic Data Interchange Transaction Set Implementation Guide, Health Care Claim: Institutional, 837, ASC X12N 837 and Professional, ASC X12N, and the addenda).
- Up to 25 diagnosis codes, up to 25 procedure codes, and up to 10 external cause of injury codes can be submitted. Sicker patients may not be accurately represented in the data. This may also result in total volume and percentage calculations for diagnoses and procedures not being complete.
- Gender is suppressed for patients with an ICD-10-CM code that indicates drug use, alcohol use, or an HIV-STD diagnosis. Suppression of this data element is applied separately within inpatient and outpatient data sets.

- The last two digits of the ZIP code are suppressed if there are fewer than thirty patients included in the ZIP code. The entire ZIP code is suppressed for patients with an ICD-10-CM code that indicates drug use, alcohol use, an HIV-STD diagnosis, or if a hospital has fewer than five discharges of a particular gender, including 'unknown'. ZIP code is changed to '88888' for patients from a state other than Texas and not from an adjacent state. If the ZIP code is changed to '88888' the state abbreviation is changed to 'ZZ'. Suppression of the ZIP code is applied separately within inpatient and outpatient data sets.
- Patient race and ethnicity data are required by law and rule to be submitted for each patient. Generally, these data are not collected by facilities directly from the patient, and may be subjectively captured and reported by the facilities.
- Inaccuracies in the data and incompleteness of the data would be addressed in the hospitals' comments if submitted by the providing facilities.
- County of residence is not collected by provider facilities. County Federal Information Processing Standard (FIPS) codes are assigned by DSHS based on patient ZIP code.
- For hospital emergency department patient visits that are admitted to the hospital and included in the inpatient discharge data, DSHS assigns the Risk of Mortality and Severity of Illness scores using methodology designed by 3M. These scores may be affected by the number of diagnoses and procedure codes collected by DSHS or by the facility's information system and may be understated.
- Diagnosis present on admission indicator codes (POA) are required for all hospitals submitting inpatient discharge data, except Critical Access Hospitals, inpatient rehabilitation hospitals, inpatient psychiatric hospitals, children's or pediatric hospitals, and long term care hospitals. Some acute care hospitals that have special units similar to the hospitals exempted from reporting POA may not include POA codes for those patients. POA codes are not required and therefore not available for outpatient data.
- Admission Source as reported by hospitals is suppressed, as recommended by the previous THCIC Council, when the Admission Type is 'newborn'. Data users can use ICD-10-CM codes to correctly identify the clinical status of newborns.
- Comparability of inpatient length of stay (LOS) across hospitals is affected by factors such as case-mix and severity complexity, payer-mix, market areas and hospital ownership, affiliation or teaching status. Any analysis of inpatient LOS at the hospital level should consider the above factors.

- Any analysis of mortality should note that the data reflect only patients who died in the hospital and not those who died after discharge from the hospital.
- The data are a snapshot in time. Hospitals must submit data no later than 60 days after the close of a calendar quarter. Depending on hospitals' collection and billing cycles, not all inpatient discharge encounters from ED visits or outpatient ED visits may have been billed or reported during the particular quarter the patient received the services. Those services may appear in the following quarter's data. This can affect the accuracy of source of payment data, particularly self-pay and charity that may later qualify for Medicaid, Medicare, or other payment sources.
- Updates to PUDF CD records, if any, are available through the THCIC website, <http://www.dshs.texas.gov/thcic/>, which should be checked periodically as notifications of an update will not be sent.
- DSHS collects data from all hospitals in the state not specifically exempted (and not owned by the United States of America). Some hospitals may be exempted for certain situations (for example, natural or other disasters, or other unusual conditions) for limited time periods.
- The hospital patient mix (the types of patients treated at hospitals vary, due to the hospital's interest and specialty services availability) should be considered when drawing conclusions about the data or making comparisons with other data.
- Any conclusions drawn from the data are subject to errors caused by the inability of the facility to communicate complete data due to form constraints, subjectivity in the assignment of codes, system mapping, and clerical error. The data are submitted by providers as their best effort to meet statutory requirements.

## **HOSPITAL COMMENTS FILE & OUTPATIENT FACILITY COMMENTS FILE**

### **(Users are advised to consider hospital comments in any analysis of the data.)**

Included with the Hospital ED PUDF is are two separate files ("Hospital Comments File" and (Outpatient Facility Comments File")) containing the unedited comments (except for removal of individual identifying information) submitted by hospitals at the time of data certification. Comments relating to individual data elements should be considered in any analysis of those data elements. These comments express the opinions of individual hospitals (or physicians or healthcare practitioners within those hospitals) and are not necessarily the views of the DSHS. Hospitals that submitted comments are identified in two separate files called the 'Hospital Comments' (for inpatient data) and 'Outpatient Facility Comments' (for outpatient data).

## **CITATION**

Any statistical reporting or analysis based on the data shall cite the source as the following:

*Texas Hospital Emergency Department Data Set, [quarter and year of data].* Texas Department of State Health Services, Center for Health Statistics, Austin, Texas. [date of publication].

## Texas Hospital Emergency Department Data Set

### DATA DICTIONARY

The purpose of this document is to provide the user with the necessary information to use and understand the data in the Hospital Emergency Department (ED) Data Set. The following information is provided:

|                      |                                                                                                                                                                                                                                                                                                                                                                                 |
|----------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Field</b>         | Unique, abbreviated name of the data element.                                                                                                                                                                                                                                                                                                                                   |
| <b>Description</b>   | Brief explanation of the data element. Descriptions of data elements are taken from specifications manuals                                                                                                                                                                                                                                                                      |

| <b>Description:</b>        | Assignment of a risk of mortality score from the All Patient Refined (APR) Diagnosis Related Group (DRG) from the 3M™ APR-DRG Grouper. Indicates the likelihood of dying.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |                     |                                                                                                          |    |                                       |    |                                                  |    |                                                      |    |                                                              |    |                                           |    |                                                          |    |             |    |                                                                     |    |             |    |                                                   |    |                          |    |                                                          |    |                                     |    |                                                                                                       |    |                                               |    |                                                                                                          |    |                             |  |  |

| <b>Description:</b>        | Attending Physician Uniform Identifier. Unique identifier assigned to the licensed physician expected to certify medical necessity of services rendered, with primary responsibility for the patient's medical care and treatment. Physician is an individual licensed to practice medicine under the Medical Practice Act. Can include an individual other than a physician who admits patients to hospitals or who provides diagnostic or therapeutic procedures to inpatients, including psychologists, chiropractors, dentists, nurse practitioners, nurse midwives, and podiatrists authorized by the hospital to admit or treat patients.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |                     |                                                                                                          |    |                                       |    |                                                  |    |                                                      |    |                                                              |    |                                           |    |                                                          |    |             |    |                                                                     |    |             |    |                                                   |    |                          |    |                                                          |    |                                     |    |                                                                                                       |    |                                               |    |                                                                                                          |    |                             |  |  |
| <b>Suppression:</b>        | Suppressed when the number of physicians represented in a DRG for a hospital is less than the minimum cell size of five.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |                     |                                                                                                          |    |                                       |    |                                                  |    |                                                      |    |                                                              |    |                                           |    |                                                          |    |             |    |                                                                     |    |             |    |                                                   |    |                          |    |                                                          |    |                                     |    |                                                                                                       |    |                                               |    |                                                                                                          |    |                             |  |  |

**Description:** Operating or other Physician Uniform Identifier (if applicable). Unique identifier assigned to the operating physician or physician other than the attending physician. Physician is an individual licensed to practice medicine under the Medical Practice Act. Can include an individual other than a physician who admits patients to hospitals or who provides diagnostic or therapeutic procedures to inpatients, including psychologists, chiropractors, dentists, nurse practitioners, nurse midwives, and podiatrists authorized by the hospital to admit or treat patients.

**Suppression:** Suppressed when the number of physicians represented in a DRG for a hospital is less than the minimum cell size of five.

**Coding Scheme:** 9999999998 Cell size less than 5  
9999999999 Temporary license or license number could not be matched

**Beginning Position:** 736 **Data Source:** Assigned  
**Length:** 10 **Type:** Alphanumeric

---

**Field 165: ENCOUNTER\_INDICATOR**

**Description:** Indicates the number of claims used to create the encounter

**Beginning Position:** 746 **Data Source:** Calculated  
**Length:** 2 **Type:** Alphanumeric

---

**Field 166: PROVIDER\_NAME**

**Description:** Hospital name provided by the hospital.

**Suppression:** Hospitals with fewer than 50 discharges (Provider ID equals '999999') are assigned the name 'Low Discharge Volume Hospital'. If a hospital has fewer than 5 discharges of a particular gender, including 'unknown', Hospital Name is blank.

**Beginning Position:** 748 **Data Source:** Provider  
**Length:** 55 **Type:** Alphanumeric

**Field 12: PAT\_ZIP**

**Description:** Patient's five-digit ZIP code.

**Suppression:** Last two digits are blank if a ZIP code has fewer than 30 patients. If state equals 'ZZ', ZIP code equals '88888'. If state equals 'FC' (foreign country) ZIP code is blank. If ICD-10-CM indicates alcohol or drug use or an HIV diagnosis the ZIP code is blank. If a facility has fewer than fifty outpatient services reported for the quarter the ZIP code is blank. If a facility has fewer than 5 patients reported of a particular gender, including 'unknown', the ZIP Code is blank.

| <b>Field 1:</b>            | <b>THCIC_ID</b>                                                                                                                                                                                                                                                                                                           |
| <b>Description:</b>        | Provider ID. Unique identifier assigned to the provider by DSHS. The THCIC_ID is consistent throughout each quarter of data and generally throughout a full year. A THCIC_ID may change Provider_Name during the middle of a year. This will be noted in such cases in which we are aware of those mid-year name changes. |
